

MYOB Accountants Enterprise

Corporate Compliance

Avoid penalties increase productivity. With just a few keystrokes, Corporate Compliance lets you complete and manage all your ASIC requirements. This powerful tool dramatically cuts down the time and cost of record keeping. And it integrates seamlessly with the rest of the Accountants Enterprise suite because it shares the same database you're already using.

Reduce the cost of keeping your clients compliant

Suitable for any size practice, Corporate Compliance generates, downloads and tracks annual statements and all major ASIC forms, share certificates, standard meeting minutes and management reports. You can also create and manage dividend statements and minutes, and it gives you a highly efficient and cost-effective way to maintain statutory registers.

When you change information, it automatically produces the documentation and list of tasks required by ASIC. It also cross-references a wealth of information about corporations, shareholdings and individuals – so keeping track of relationships is easy.

Avoid missed deadlines and penalties

The modern user interface has homepages designed to make sure you never miss a deadline. Information is easy to view, and you can instantly find answers to your questions by drilling down for detailed information.

It features helpful prompts to guide you through the options, so it's simple to navigate and identify tasks when managing your corporate compliance work. Smart tags prompt you for data that is mandatory for ASIC reporting requirements, making sure you don't miss a thing.

Improve productivity and increase profitability

Corporate Compliance allows you to easily manage tasks and workflows. It tracks the status and flow of documents between your practice and ASIC which means you maintain complete control and visibility.

Workflow Wizards simplify your day-to-day operations. The Wizards help you to bypass irrelevant steps, reduce keystrokes and increase processing speeds.

You can download data from ASIC and automatically update contact details to save time and increase accuracy. Corporate Compliance makes it easy for anyone in your practice to update registers and records, so accounting professionals have more time to devote to higher value work.

See what's important quickly and easily

You can generate reports and view information in a variety of ways, making it easier and faster to analyse complex relationships. For added flexibility, you can print forms, minutes and reports in PDF, Microsoft Word® and other common formats.

Meet the needs of your practice structure

Corporate Compliance supports multiple databases for flexibility and control within large or more complex practices.

About Accountants Enterprise

The MYOB Accountants Enterprise suite meets the needs of today's multi-partner accounting practice. The suite delivers extended functionality that can be customised to suit your unique workflows and reporting needs. Through tight integration, key information such as contacts, employees, security and reporting are accessible across the suite. Enter data once and it's automatically shared.
