

What is Lightyear?

We always say that if you start with paper, you end up with rubbish.

Lightyear is the only truly paperless AP solution. Lightyear is the only Accounts Payable solution that includes line-item data extraction from AP documents (bills, credit notes and statements), a customisable approvals workflow, and document storage. In addition, automatic Price-Checking, Statement Reconciliation and Task Management provides a complete AP solution for MYOB users, both in browser and on mobile.

Key features:

- + Immediate, accurate and detailed data-extraction from bills, statements and receipts.
- + Extract all line-item data (including currency) with 100% accuracy from your bills and statements for **no additional charge**.
- + Duplicate bills being flagged for you.
- + A customisable approvals workflow allows you to route bills to the relevant approvers automatically.
- + Mobile App - iOS and Android mobile apps allow you to get your data into Lightyear faster.
- + The approvals process creates an audit trail which is stored with the document image, 'paperclipped' associated documents and notes for your regulatory period.
- + Intelligent Rules Automation automatically assigns line-items with GL-codes, tax rates, Jobs and Categories.
- + Automatically price-check every product purchased against your agreed supplier pricing.
- + Export your data to leading inventory solutions to track product/stock data.
- + Extract summary data from your receipts in under 2 minutes.
- + Automatic supplier statement reconciliation makes closing month-end a breeze.
- + Unlimited users and companies. Add as many users and companies from your portfolio with no extra charge.
- + Full feature access - All accounts get access to all of Lightyear's features, including a dashboard view of your companies.
