

Who is Tanda for?

We build Tanda for companies who pay staff by the hour and work in either single or multiple locations. Businesses with 12 or more staff benefit the most from the platform, especially from these industries:

Hospitality

- + Hospitality
- + Food & Beverage
- + Retail
- + Franchise
- + Healthcare
- + Veterinary
- + Accommodation
- + Pubs and Clubs
- + Manufacturing
- + Warehousing
- + Racing
- + Entertainment
- + Transportation
- + Agriculture, Farming, & Fishing
- + Government and City Councils

Whether you're running a family shop or are in charge of a huge brand with global branches, Tanda can cut down workforce management tasks from days to just a few minutes. Move from age old pen-and-paper processes to a cloud-based platform. Tanda solves these workforce management problems for any business::

- + Using a manual process to create, publish, and record employee attendance
- + Inability of staff to log attendance in remote locations
- + Struggling to foresee costs per employee's/team's shift
- + Slow and inconsistent communication streams on rosters and shift performance
- + Overwhelming need to always fill vacant shifts
- + Difficulty in monitoring teams, locations, and sales per store
- + Poor wage reporting and payroll processing
- + Taking too much time to calculate pay rates and awards
